Course Content

Faculty Details

Module	Faculty Name
1. Python For Data Science	Dr. Abhinanda Sarkar
2. Statistics for Data Science	Dr. Abhinanda Sarkar
3. Optional Content: Hypothesis Testing	Dr. Abhinanda Sarkar
4. Optional Content: Hypothesis Testing	Joseph Duetsch
5. Making Sense of Unstructured Data - Clustering	Prof. Tamara Broderick, Jegelka
6. Making Sense of Unstructured Data - Dimensionality Reduction Techniques	Prof. Caroline Uhler
7. Optional Content: Making Sense of Unstructured Data	Prof. Stefanie Jegelka
8. Regression and Prediciton	Prof. John Tsitsiklis
9. Optional Content: Regression and Prediction	Prof. Victor Chernozhuk
10. Classification and Hypothesis Testing	Prof. Jonathan Kelner,P Gamarnik
11. Classification and Hypothesis Testing :Hypothesis Testing	Prof. Caroline Uhler
12. Classification and Hypothesis Testing:Logistic Regression and Support Vector Machines	Prof. David Gamarnik
13. Classification and Hypothesis Testing: Decision Trees and Random Forest	Prof. Munther Dahleh
14. Optional Content: Classification and Hypothesis Testing	Prof. David Gamarnik
15. Deep Learning	Prof. Stefanie Jegelka
16. Optional Content: Deep Learning for Computer Vision	Prof. Stefanie Jegelka
17. Optional Content: Deep Learning Overview	Prof. Ankur Moitra
18. Recommendation Systems	Dr. Devavrat Shah
19. Optional Content: Recommendation Systems	Dr. Philippe Rigollet, Dr.
20. Networking and Graphical Models	Prof. Caroline Uhler, Pro
21. Predictive Analytics	Kalyan Veeramachanen
