Guide to Google Colab

The **Google Colab** Toolbar looks like -

- **File**: When you click on the view you will find a list of options like 'New Notebook', 'Open Notebook', 'Upload Notebook', 'Save', 'Rename', 'Move', 'Save a copy in drive', 'Download' etc The 'Download' option will show options to download the current notebook in different formats like .ipynb, .py formats

- **Edit**: When you click on the view you will find options like Cut, Copy, Paste, Delete, etc. for Cells.
  Cells here refer to the fields where the code is written. (Area marked in Red in the following image)

- **View**: When you click on the view you will find the 'Table of contents', 'Notebook info', 'Executed code history', etc., options
- **Insert**: When you click on the view you will find 'Code Cell', 'Text Cell', etc. options
- **Runtime**: When your notebook hangs or is in an endless loop (while loop)- you can click on Runtime and 'Interrupt Execution', 'Restart Runtime'. There will be other options like 'Run all', 'Run before', 'Run after', etc
- **Tools**: When you click on the view you will find 'Settings', 'Keyboard shortcuts'
- **+Code**: When you click on +Code option it will add a new code block
- **+Text**: When you click on +Text option it will add a new text block
