Course Content

Learning Instruments

There are various instruments of learning that are important to be used effectively together.

1. **Video Lectures** form the foundation of learning material for this course. The lectures are designed to develop a fundamental understanding of Python.

2. The **hands-on notebooks** used in the lectures can be found at the end of each module.

3. **Test Your Understanding** quizzes are interspersed with video lectures to nudge you to check your grasp on the concepts covered in the videos watched.

4. At the end, there is one **Practice quizzes** that will help you to test your understanding of the content covered in this course.

Guidelines:

. While watching the **hands-on video lectures**, it is highly recommended that you work simultaneously with the Professor.
